- per child (US$): 1.2

#### EQUITY

- Coverage gap by wealth quintile

#### SYSTEMS

- International Code of Marketing of Breastmilk Substitutes: Yes
- New CRS formula and stance for management of diarrhoea: Yes
- WHO international list of essential medicines: Yes

#### Water and Sanitation

- Current sources of water: 100%
- Mostly piped: 100%
- Number of children under 5 years using improved sanitation facilities: 86%
- Total: 86%

#### Policies

- Immunization: Yes
- Expanded Programme on Immunization (EPI): Yes

### Nutritional Indicators

- Vitamin A supplementation: 96%
- Exclusive breastfeeding: 100%
- Complementary feeding: 60%

#### Immunization

- Children under 12 months: 86%
- Children under 12 months: 86%

### Maternal and Newborn Health Indicators

- Total under-five deaths: 550 (2006)

### Interventions for Mothers, Newborns, and Children

- Exclusive breastfeeding: 86%
- Complementary feeding: 60%

#### Literacy

- Percent of children immunised with 3 doses Hib: 40%
- Percent of children immunised with 3 doses DPT: 60%

#### Contraception

- Current contraceptive prevalence rate: 28%

#### Unmet Need for Family Planning

- Percent of women using contraception: 52%

### Causes of under-five deaths (2008)

- Pneumonia: 29% of under-five deaths
- Diarrhoea: 26% of under-five deaths
- Infections: 32% of under-five deaths
- Other direct causes: 5% of under-five deaths

### Water

- Current sources of water: 100%
- Mostly piped: 100%
- Number of children under 5 years using improved sanitation facilities: 86%
- Total: 86%

### Causes of maternal deaths (2008)

- AIDS: 15% of maternal deaths
- Uterine rupture or separations: 10% of maternal deaths
