**Note:** Scale intervals for the table are shown in the example cover profile for this country.

**Figure 1** - Coverage levels in the poorest and richest quintiles for selected interventions along the continuum of care.

**Source:** Bolivia (DHS 1998 & DHS 2008)

Coverage levels are shown for the poorest 20% (red circles) and the richest 20% (yellow circles). The longer the line between the two groups, the greater the absolute inequality. For quintiles with small sample sizes, estimates are not shown in the graphs.

**Figure 2** - Coverage levels in the ﬁve wealth quintiles for selected interventions along the continuum of care.

**Source:** Bolivia (DHS 1998 & DHS 2008)

The horizontal lines connect the richest (yellow circles) and poorest (red circles) quintiles. The longer the line between the two groups, the greater the absolute inequality. For quintiles with small sample sizes, estimates are not shown in the graphs.
