**Source:** Congo (DHS 2005 & DHS 2011)

Coverage levels are shown for the poorest 20% (red circles) and the richest 20% (yellow circles). The longer the line between the two groups, the greater the absolute inequality.

**Coverage levels for selected interventions along the continuum of care.**

**Figure 1:** Coverage levels in the poorest and richest quintiles for selected interventions along the continuum of care.

**Figure 2:** Coverage levels in the five wealth quintiles for selected interventions along the continuum of care.

**Number of interventions**

- 0
- 1

- 8
- 9

**Source:** Congo (DHS 2011)

The maximum number of interventions for this survey is 9.

**Figure 3:** Co-coverage of health interventions: percentage of children aged 1-4 years according to the number of key childhood-survival interventions received, by wealth quintile.

**Figure 4:** Composite coverage of selected interventions and corresponding coverage gap (how much is needed to reach universal coverage), by wealth quintile.
