Table - Coverage of Countdown indicators at national level and by key equity stratiﬁers. Please see the example cover proﬁle for guidance on interpreting the table and graphs.

### Figures

**Figure 1** - Coverage levels in the poorest and richest quintiles for selected interventions along the continuum of care.

**Figure 2** - Coverage levels in the ﬁve wealth quintiles for selected interventions along the continuum of care.

**Figure 3** - Co-coverage of health interventions: percentage of children aged 1-4 years according to the number of key child-survival interventions received, by wealth quintile.

**Figure 4** - Composite coverage of selected interventions and corresponding coverage gap (how much is needed to reach universal coverage), by wealth quintile.

---

**Wealth quintiles:** Q1: poorest 20%  Q2  Q3  Q4  Q5: richest 20%

**The horizontal lines connect the richest (yellow circles) and poorest (red circles) quintiles. The longer the line between the two groups, the greater the absolute inequity. For quintiles with small sample sizes, estimates are not shown in the graphs.**

---

**Note:** The maximum number of interventions for this survey is 9.
