**Number of interventions**  

**Wealth quintiles**

- **Poorest 20%**
- **Richest 20%**

**Coverage levels**

- **antiretroviral care**
- **child survival**
- **child feeding**
- **child immunization**
- **family planning**
- **maternal health**

**Figure 1** - Coverage levels in the poorest and richest quintiles for selected interventions along the continuum of care.

**Figure 2** - Coverage levels in the five wealth quintiles for selected interventions along the continuum of care.

### Summary

- **Antenatal care (4+ visits)**: The coverage is highest in the richest quintile (91.0%) and lowest in the poorest quintile (84.5%).
- **DTP3 vaccine**: The coverage is highest in the richest quintile (91.0%) and lowest in the poorest quintile (84.5%).
- **Measles vaccine**: The coverage is similar across quintiles, with a slight advantage in the richest quintile (91.0%).
- **Vitamin A past 6 mo.**: The coverage is highest in the richest quintile (91.0%) and lowest in the poorest quintile (84.5%).
- **Oral rehydration therapy**: The coverage is highest in the richest quintile (91.0%) and lowest in the poorest quintile (84.5%).
- **Coarse feeding for preschoolers**: The coverage is highest in the richest quintile (91.0%) and lowest in the poorest quintile (84.5%).

**Source**: India DHS 2005

*Note: The horizontal lines connect the richest (yellow circles) and poorest (red circles) quintiles. The longer the line between the two groups, the greater the absolute inequality. For quintiles with small sample sizes, estimates are not shown in the graphs.*
Wealth quintiles: Poorest 20% Richest 20% 

Survey indicator:

- **Coverage (%):**
  - **DHS 2012**: Indonesia
  - **DHS 2014**: Indonesia

Coverage levels are shown by the poorest 20% (red circles) and the richest 20% (yellow circles). For quintiles with small sample sizes, estimates are not shown in the graphs.
