**Notes:**
- The maximum number of interventions for this survey is 8.

### Indonesia DHS 2012

For quintiles with small sample sizes, estimates are not shown in the graphs. The horizontal lines connect the richest (yellow circles) and poorest (red circles) quintiles. The maximum number of interventions for the co-coverage indicator for this survey is 8.

**Source:** Indonesia (DHS 2002 & DHS 2012)

Coverage gaps are shown for the poorest 20% (red circle) and for the closest 20% (yellow circle).

### Indonesia

**Table 3:** Co-coverage of health interventions: percentage of children aged 1-4 years according to the number of key child survival interventions received, by wealth quintile.

**Figure 3:** Coverage levels in the poorest and richest quintiles for selected interventions along the continuum of care.

**Figure 4:** Composite coverage of selected interventions and corresponding coverage gap (how much is needed to reach universal coverage), by wealth quintile.

**Source:** Indonesia DHS 2012

**Table 4:** Co-coverage of health interventions: percentage of children aged 1-4 years according to the number of key child survival interventions received, by wealth quintile.

**Figure 5:** Coverage levels in the poorest and richest quintiles for selected interventions along the continuum of care.

**Figure 6:** Composite coverage of selected interventions and corresponding coverage gap (how much is needed to reach universal coverage), by wealth quintile.
