### Table - Coverage of Countdown indicators at national level and by key equity stratifiers.

The table provides coverage levels for selected interventions along the continuum of care, stratified by wealth quintiles and other equity indicators. Coverage is shown for the poorest 20% (red circles) and the richest 20% (yellow circles) of the population. The longer the line between the two groups, the greater the absolute inequality. For quintiles with small sample sizes, estimates are not shown in the graphs.

#### Wealth quintiles:
- **Poorest 20%**
- **Richest 20%**

**Coverage levels for selected interventions along the continuum of care.**

#### Figure 1 - Coverage levels in the poorest and richest quintiles for selected interventions along the continuum of care.

#### Figure 2 - Coverage levels in the five wealth quintiles for selected interventions along the continuum of care.

---

**Coverage levels for the poorest 20% (red circles) and the richest 20% (yellow circles) of the population. The longer the line between the two groups, the greater the absolute inequality.**

For quintiles with small sample sizes, estimates are not shown in the graphs.
