

# Countdown capacity building

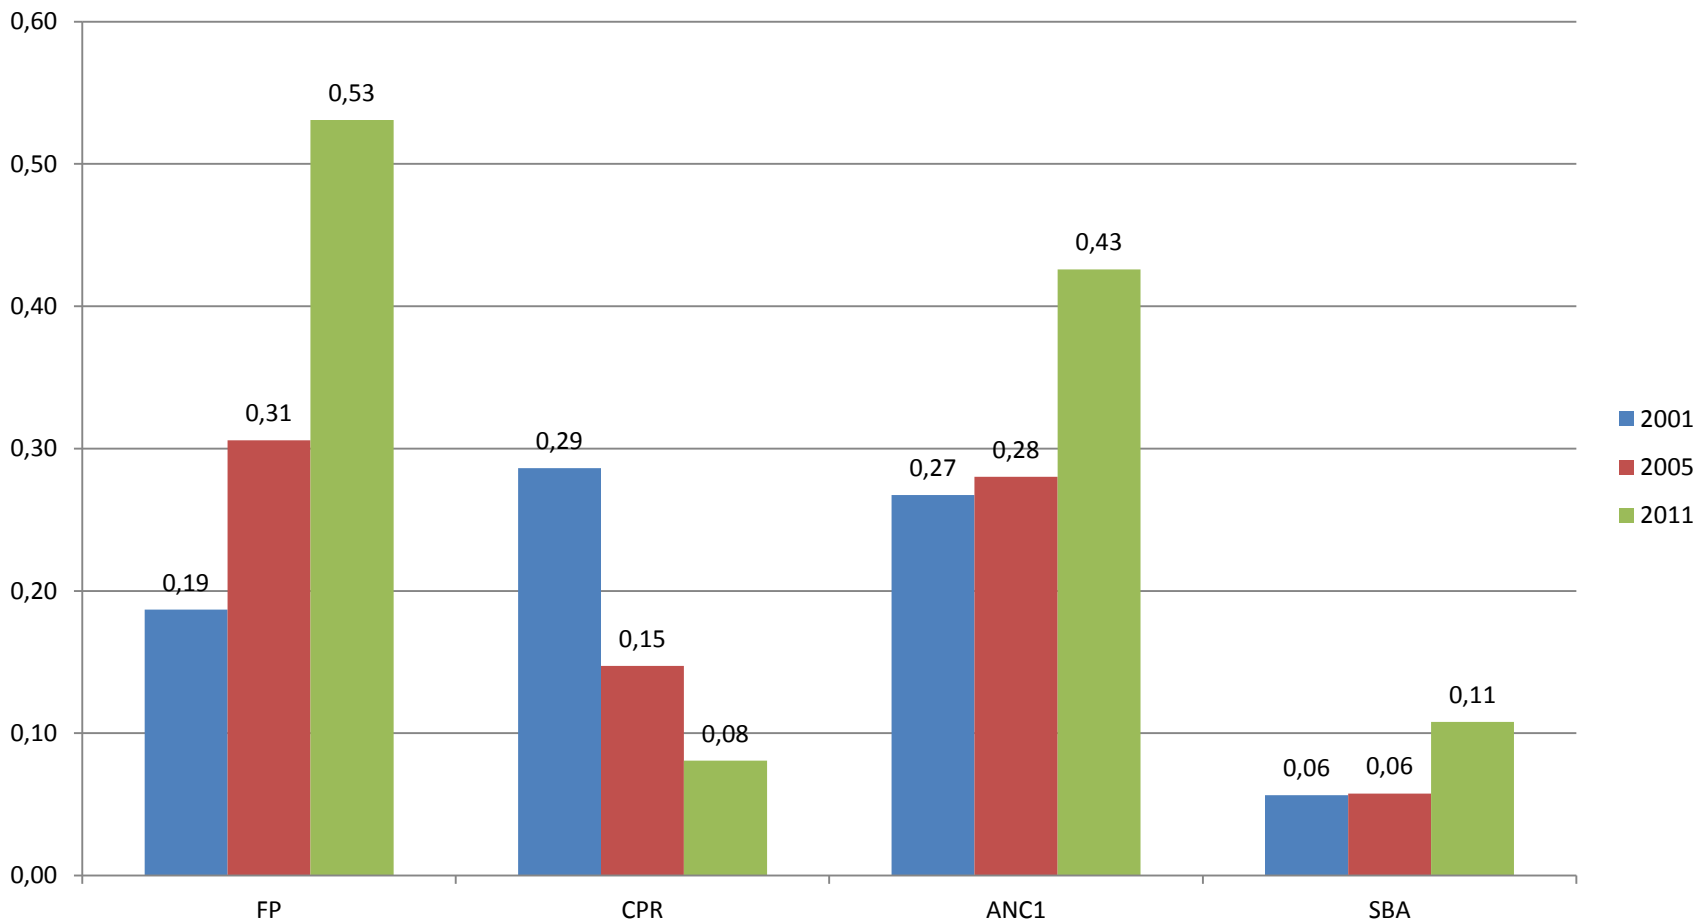

17-21 June 2013

Pelotas, Brazil

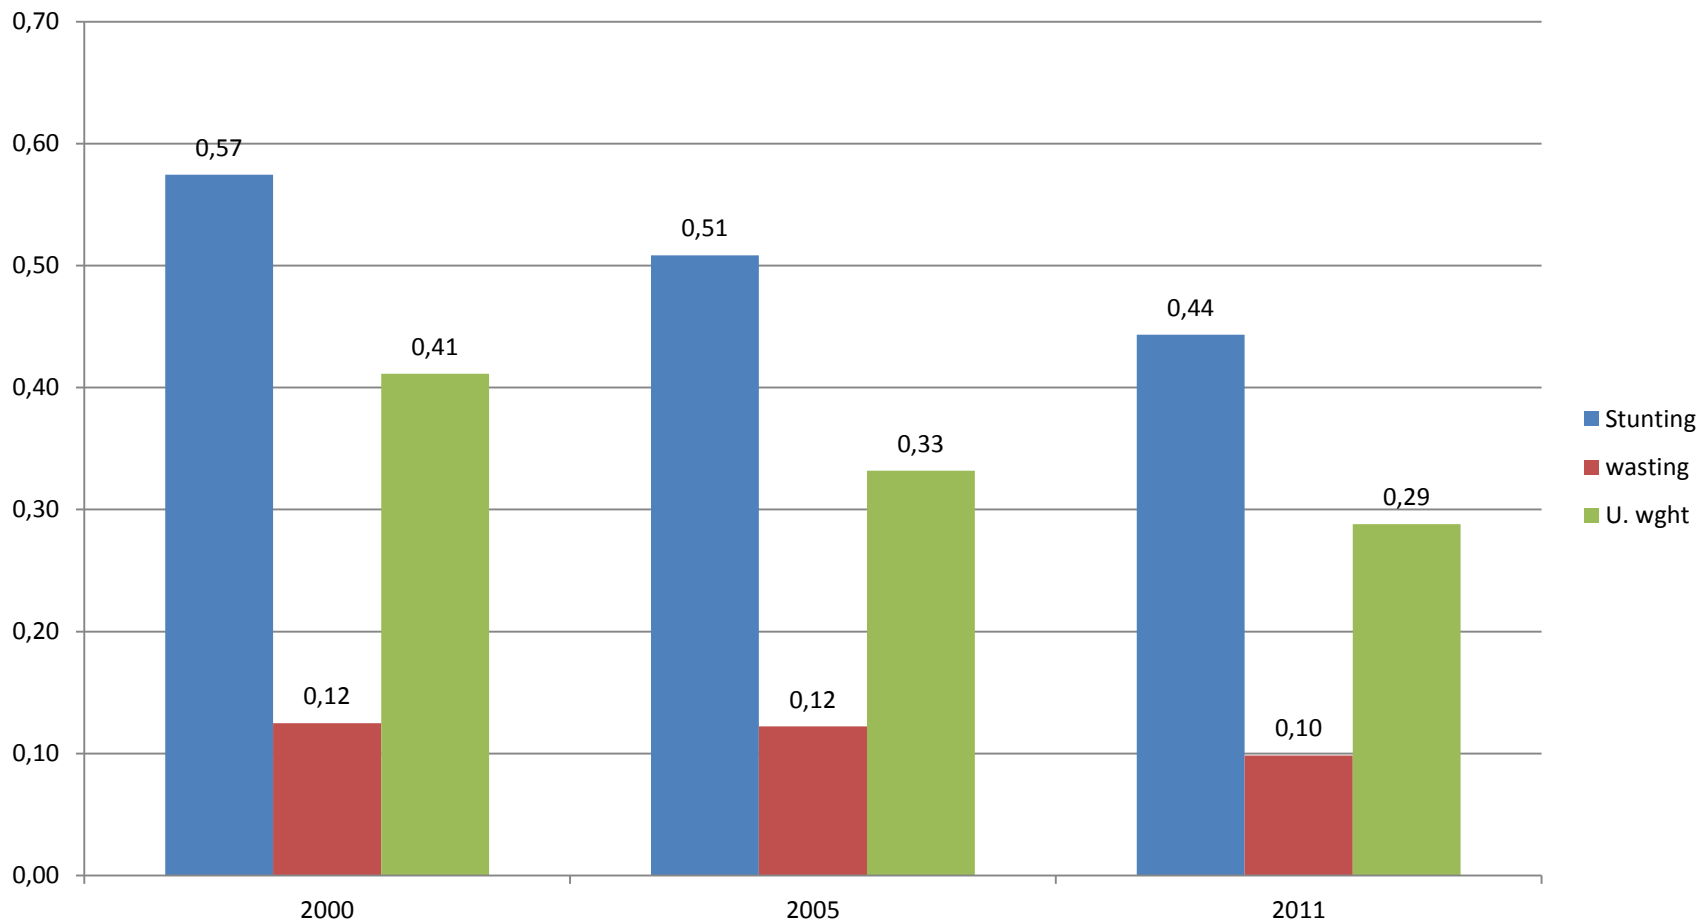

# Lesson

- Data source
- Mortality estimation
- LiST analysis
- Equity analysis

# Maternal health interventions

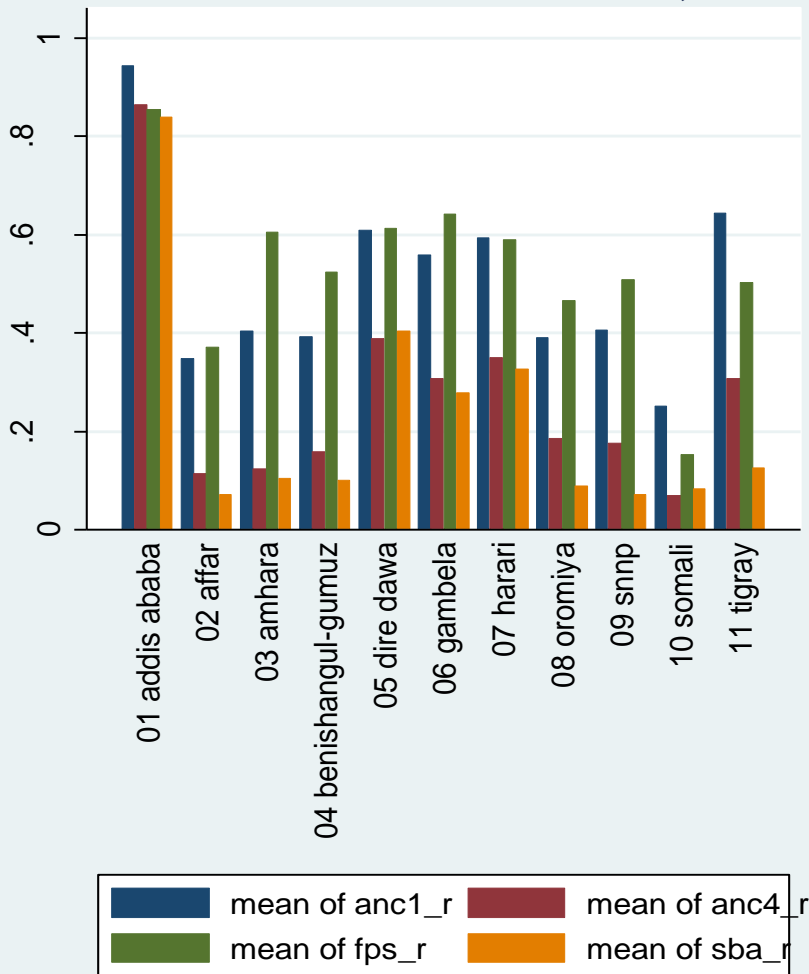

# Nutritional status

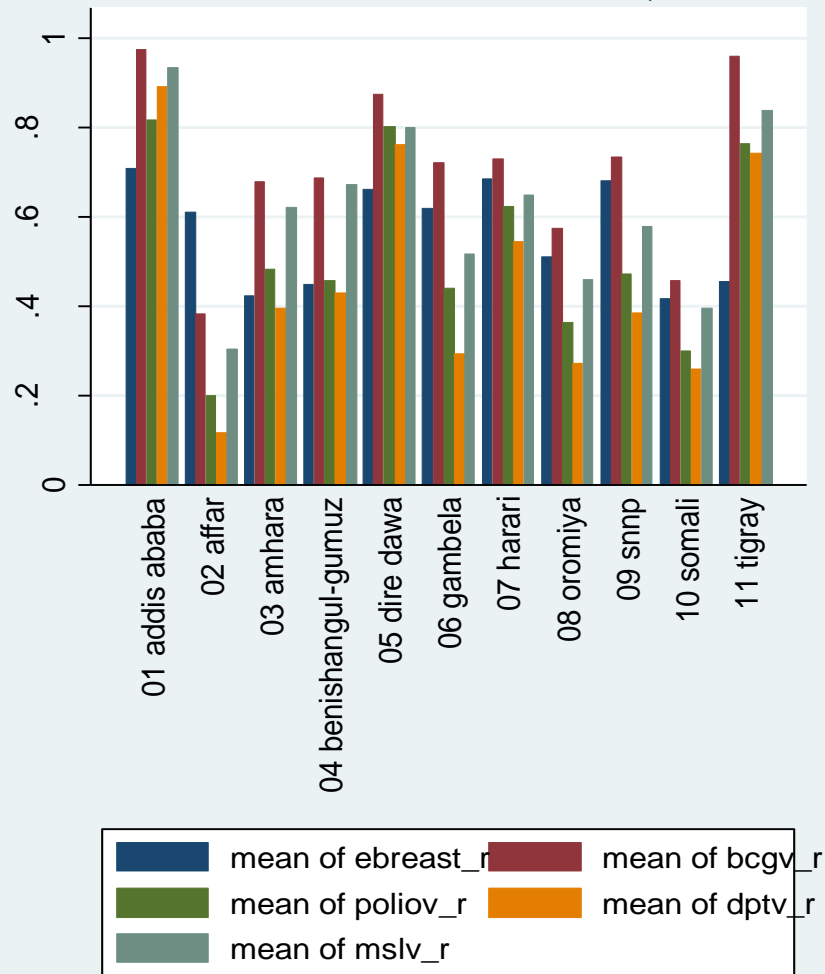

# Intervention coverage by geographical regions in Ethiopia

## Maternal health Interventions, 2011

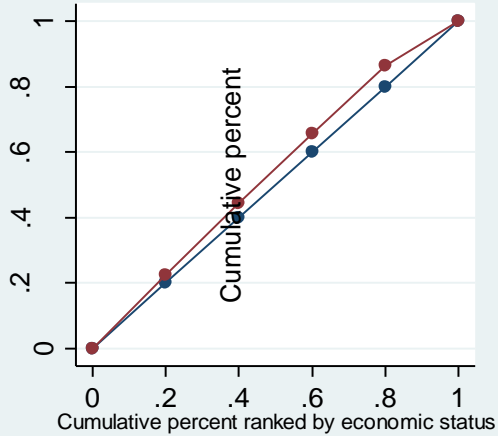

## Child health interventions, 2011

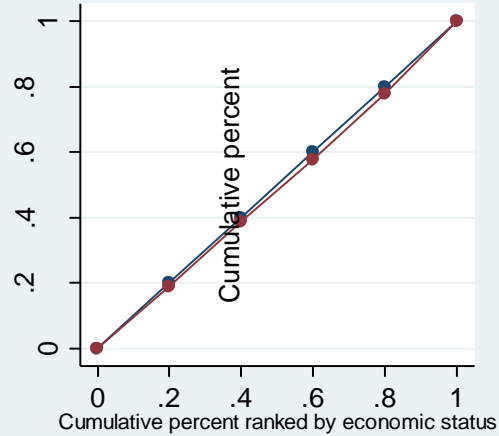

# Concentration index

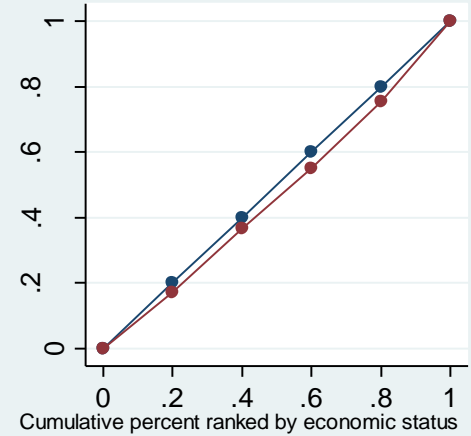

Concentration index for stunting using EDHS 2011

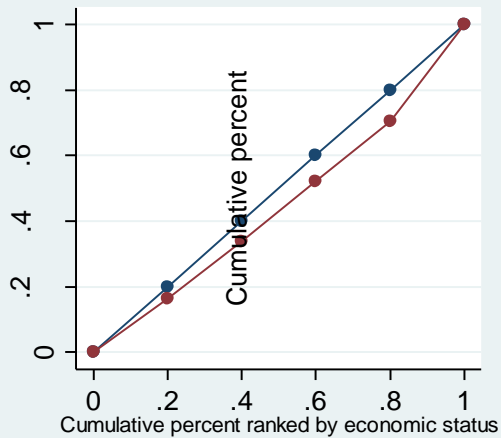

Cix for early initiation of BF using EDHS 2011

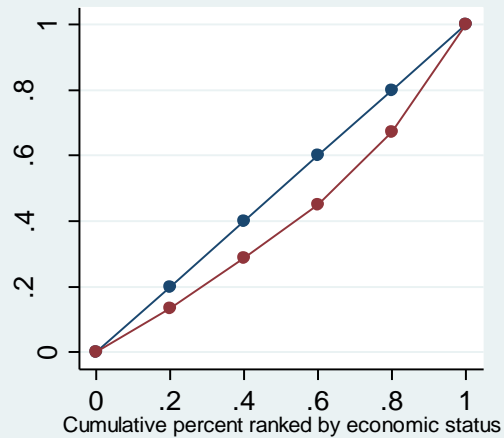

Cix for bcg vaccine using EDHS 2011

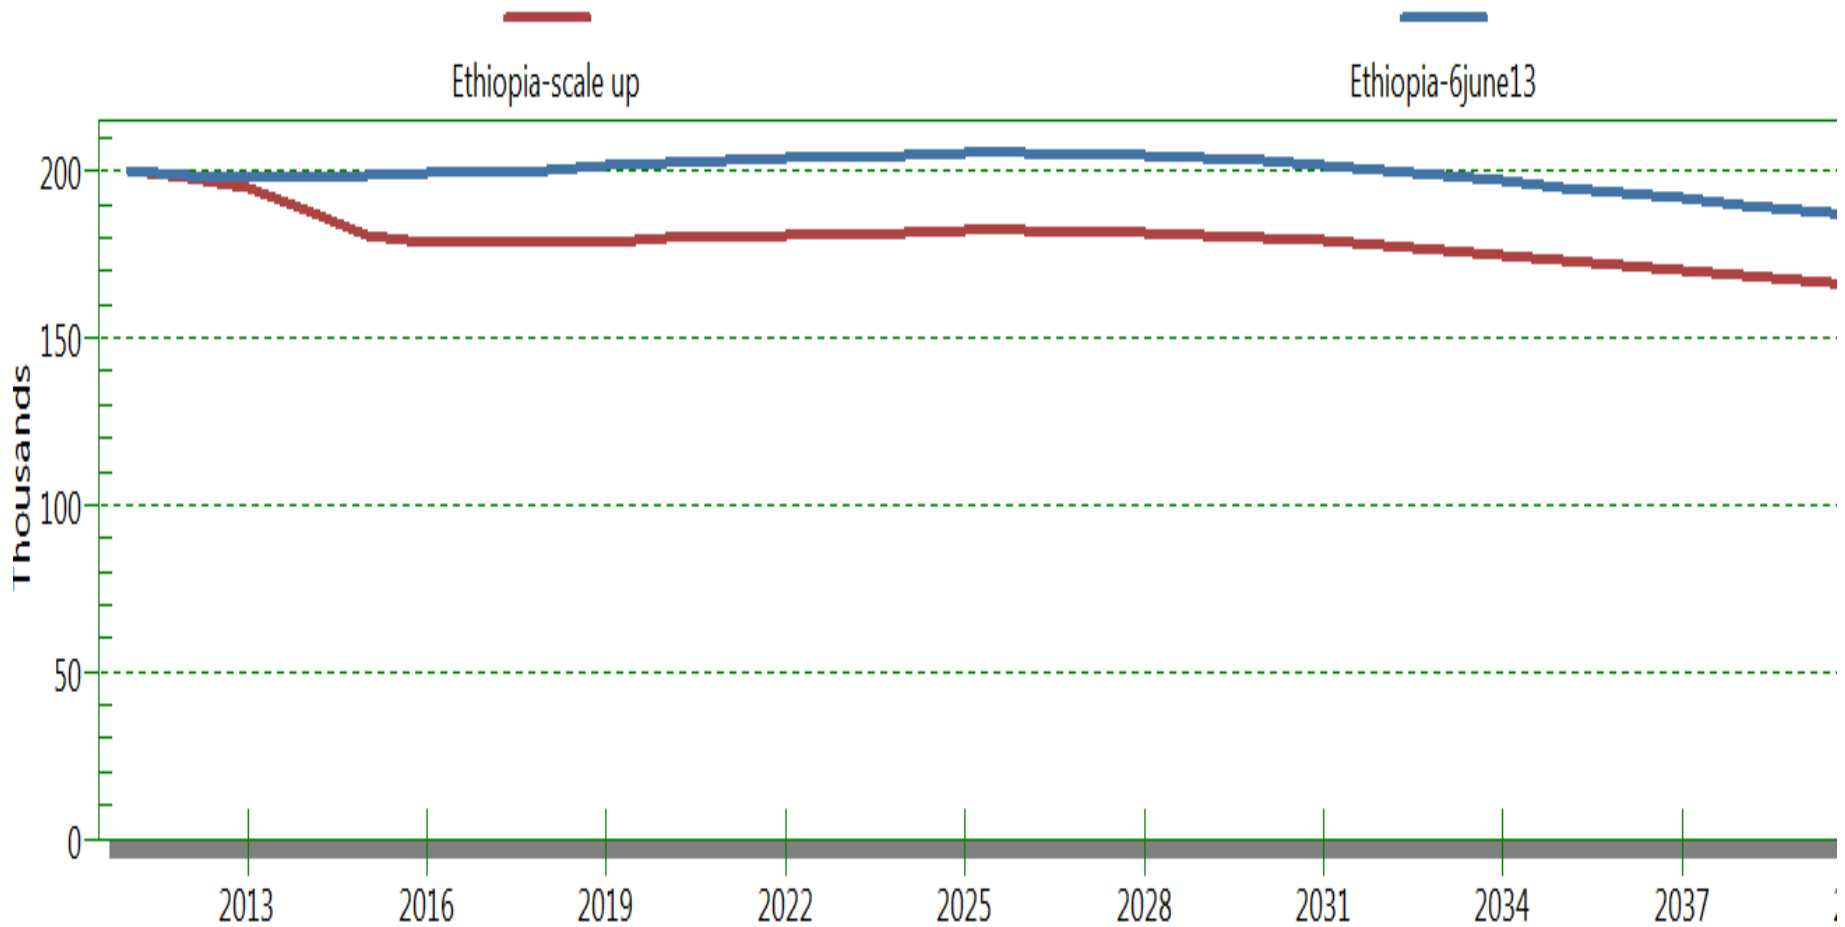

Concentration index for polio vaccin

Concentration index for dpt vaccine using EDHS 2011

# Deaths in children under-five years of age (Total (0-60 months))

# Interpretations

- Improvement in intervention Coverage over the last decade
- Steadily decline in stunting and wasting
- Huge difference in coverage among regions
- Inequitable distribution of intervention coverage and their impacts

-

# Rationale for case study

- Track changes made over time
- To accelerate current status of intervention coverage
- Share achievements and success stories
- Identify major area of gaps and devise strategy to tackle them

# Proposed Activities

- Documentation and analysis of RMNCH policies, Programs and contextual factor national and across all the region
- Coverage analysis and LiST
- Analysis of Family planning, child survival and nutrition
- Equity analysis
- Finance analysis
- In country workshop

# Time table and budget

- Proposed to do the case study with in six month
- Budget estimation for each set of activities has been finalized
