Country profiles

The information in the country profiles, customized to showcase the core indicators selected by the Commission on Information and Accountability for Women’s and Children’s Health, is intended to help policy makers and their partners assess progress and prioritize actions to save women’s and children’s lives. These country profiles reflect the data that are available for each country. Most of the data for the Commission indicators come from household surveys: mainly the USAID-supported Demographic and Health Surveys and the UNICEF-supported Multiple Indicator Cluster Surveys. More information on the data sources for the Commission indicators is available in the annexes to previous Countdown reports: www.countdown2015mnch.org/reports-and-articles.

New survey data are available for 22 countries since the publication of Countdown’s 2012 Report. Coverage estimates that are missing or that are more than five years old indicate an urgent need for concerted action to increase data collection efforts so that updated evidence is available for policy and program development.

This report contains profiles for 75 countries with high burdens of maternal and/or child mortality, including the 49 lowest-income countries covered by the Global Strategy for Women’s and Children’s Health. Profiles are included for the following countries:

Afghanistan  Gambia  Nigeria
Angola   Ghana   Pakistan
Azerbaijan   Guatemala   Papua New Guinea
Bangladesh   Guinea   Peru
Benin   Guinea-Bissau   Philippines
Bolivia   Haiti   Rwanda
Botswana   India   São Tomé and Príncipe
Brazil   Indonesia   Senegal
Burkina Faso   Iraq   Sierra Leone
Burundi   Kenya   Solomon Islands
Cambodia   Korea, Democratic People’s Republic of   Somalia
Cameroon   Kyrgyzstan   South Africa
Central African Republic   Lao People’s Democratic Republic   South Sudan
Chad   Lesotho   Sudan
China   Liberia   Swaziland
Comoros   Madagascar   Tajikistan
Congo   Malawi   Tanzania, United Republic of
Congo, Democratic Republic of the Côte d’Ivoire   Mali   Togo
Djibouti   Mauritania   Turkmenistan
Egypt   Mexico   Uganda
Equatorial Guinea   Morocco   Uzbekistan
Eritrea   Mozambique   Vietnam
Ethiopia   Myanmar   Yemen
Gabon   Nepal   Zambia
Niger   Zimbabwe
**Demosgraphics**

- Total population (600): 6,288
- Total under-five population (000): 682
- Births (000): 140
- Birth registration (%): 72
- Total under-five deaths (000): 6
- Neonatal deaths: % of all under 5 deaths: 42
- Neonatal mortality rate (per 1000 live births): 38
- Infant mortality rate (per 1000 live births): 34
- Stillbirth rate (per 1000 total births): 14
- Total maternal deaths: 670
- Lifetime risk of maternal death (1 in N): 74
- Total fertility rate (per woman): 2.7
- Adolescent birth rate (per 1000 women): 110

**Maternal and Newborn Health**

- **Coverage along the continuum of care**
  - Demand for family planning satisfied: 50%
  - Antenatal care (4+ visits): 20
  - Skilled attendant at delivery: 26%
  - *Postnatal care: 69%
  - Exclusive breastfeeding: 6%
  - Measles: 26

- **Skilled attendant at delivery**
  - Pre-pregnancy: 58%
  - Pregnancy: 20%
  - Birth: 19%
  - Neonatal period: 15%
  - Infant: 20%

- **Under-five mortality rate**
  - Deaths per 1000 live births: 148

- **Maternal mortality ratio**
  - Deaths per 100,000 live births: 42

- **Prevention of mother-to-child transmission of HIV**
  - Eligible HIV positive women receiving ARV for their own health (% of total ARVs): 49
  - Percent HIV positive women receiving ARVs for PMTCT: 42
  - Uncertainty range around the estimate: 30

**EQUITY**

- **Socioeconomic inequities in coverage**
  - Household wealth quintile: Poorest 20% vs. Richest 20%
  - Demand for family planning satisfied: Antenatal care 1+ visit, Antenatal care 4+ visits, Skilled birth attendant, Early initiation of breastfeeding, ITN use among children <5 yrs, DTP3, Measles, Vitamin A (past 6 months), ORT & continued feeding, Care seeking for pneumonia

**Child Health**

- **Immunization**
  - Percent of children immunized against measles: 78%
  - Percent of children immunized with 3 doses DTP: 69%
  - Percent of children immunized with 3 doses Hib: 69%

- **Pneumonia treatment**
  - Percent children <5 years with suspected pneumonia taken to appropriate health provider: 36
  - Percent children <5 years with suspected pneumonia receiving antibiotics: 32

**Nutrition**

- **Wasting prevalence (moderate and severe, %)**: 7
- **Low birthweight incidence (moderate and severe, %)**: 11
- **Introduction of solid, semi-solid/soft foods (%)**: 41
- **Vitamin A two dose coverage (%)**: 92

- **Underweight and stunting prevalence**
  - Percent children <5 years who are underweight: 54
  - Percent children <5 years who are stunted: 53

- **Exclusive breastfeeding**
  - Percent infants <6 months exclusively breastfed: 23

**Developed by Countdown to report on core indicators identified by the UN Commission on Information and Accountability, in support of the Global Strategy for Women's and Children's Health**

*Note: MICS Target calculated by Countdown to 2015.*
**Maternal and Newborn Health**

**Socioeconomic inequities in coverage**

Household wealth quintile:
- Poorest 20%
- Richest 20%

- Demand for family planning satisfied
- Antenatal care
  - 1+ visit
  - 4+ visits
- Skilled attendant at delivery
- Early initiation of breastfeeding
- ITN use among children <5 yrs
- DPT3
- Measles
- Vitamin A (past 6 months)
- ORT & continued feeding
- Careseeking for pneumonia

**Immunization**

- Percent of children immunized against measles
- Percent of children immunized with 3 doses DTP
- Percent of children immunized with 3 doses Hib

**Child Health**

- Wasting prevalence (moderate and severe, %)
- Low birthweight incidence (moderate and severe, %)

**Underweight and stunting prevalence**

- Percent children <5 years who are underweight
- Percent children <5 years who are stunted

**Exclusive breastfeeding**

- Percent infants <6 months exclusively breastfed

**Equity**

Demand levels are shown for the poorest 20% (red circles) and the richest 20% (orange circles). The longer the line between the two groups, the greater the inequality. These estimates may differ from other charts due to differences in data sources.

- Neonatal deaths (% of all under-5 deaths): 17
- Infant mortality rate (per 1000 live births): 72
- Stillbirth rate (per 1000 total births): 6
- Total maternal deaths: 4,300
- Lifetime risk of maternal death (1 in N): 43
- Total fertility rate (per woman): 4.8
- Adolescent birth rate (per 1000 women): 193

**Under-five mortality rate**

- Deaths per 1000 live births

**Maternal mortality ratio**

- Deaths per 100,000 live births

**Equity**

*See Annex/website for indicator definition*

**Notes:** Based on 2006 WHO reference population

**Child Health**

- Immunization:
  - Percent of children immunized against measles
  - Percent of children immunized with 3 doses DTP
  - Percent of children immunized with 3 doses Hib

- Pneumonia treatment:
  - Percent children <5 years with suspected pneumonia taken to appropriate health provider
  - Percent children <5 years with suspected pneumonia receiving antibiotics

- Underweight and stunting prevalence:
  - Percent children <5 years who are underweight
  - Percent children <5 years who are stunted

- Wasting prevalence (moderate and severe, %)
- Low birthweight incidence (moderate and severe, %)

**Nurtition**

- Early initiation of breastfeeding (within 1 hr of birth, %)
- Introduction of solid, semi-solid/soft foods (%)
- Vitamin A two dose coverage (%)

**Exclusive breastfeeding**

- Percent infants <6 months exclusively breastfed

Note: Based on 2006 WHO reference population

Percent infants <6 months exclusively breastfed

**EQUITY**

Socioeconomic inequities in coverage

Household wealth quintile: Poorest 20% - Richest 20%

- Demand for family planning satisfied
- Antenatal care 1+ visit
- Antenatal care 4+ visits
- Skilled birth attendant
- Early initiation of breastfeeding
- ITN use among children ≤5 yrs
- Measles
- Vitamin A (past 6 months)
- ORT & continued feeding
- Case-seeking for pneumonia

Coverage levels are shown for the poorest 20% (red circle) and the richest 20% (orange circle). The longer the line between the two groups, the greater the inequality. These estimates may differ from other charts due to differences in data sources.

Developed by Countdown to report on core indicators identified by the UN Commission on Information and Accountability, in support of the Global Strategy for Women’s and Children’s Health.

  - Lifetime risk of maternal death (1 in N)
  - Total fertility rate (per woman)
  - Adolescent birth rate (per 1000 women)

- **Early neonatal period**
  - Neogonatal deaths

- **Infancy**
  - Infant deaths: % of all under 5 deaths
  - Infant mortality rate (per 1000 births)

- **Childhood**
  - Child mortality rate (per 1000 children)

**Skilled attendant at delivery**

- Percentage live births attended by skilled health personnel
- Percentage skilled birth attendants

**Prevention of mother-to-child transmission of HIV**

- Eligible HIV+ pregnant women receiving ARVs for their own health (% of total ARVs)
- Percentage HIV+ pregnant women receiving ARVs for PMTCT
- Percentage HIV+ pregnant women receiving ARVs

**Child Health**

- **Immunization**
  - Percentage children immunized against measles
  - Percentage of children immunized with 3 doses DTP
  - Percentage of children immunized with 3 doses Hib

- **Pneumonia treatment**
  - Percentage children <5 years with suspected pneumonia taken to appropriate health provider
  - Percentage children <5 years with suspected pneumonia receiving antibiotics

**Nutrition**

- **Wasting prevalence (moderate and severe, %)**
  - 0 (2011)
  - 8 (2017)

- **Low birthweight incidence (moderate and severe, %)**
  - 8 (2017)

- **Introduction of solid, semi-solid/soft foods (%)**
  - 82 (2017)

- **Vitamin A two dose coverage (%)**
  - 28 (2016)

**Underweight and stunting prevalence**

- Percentage children <5 years who are underweight
  - Percentage children <5 years who are stunted

**Exclusive breastfeeding**

- Percentage infants <6 months exclusively breastfed

---

Developed by Countdown to report on core indicators identified by the UN Commission on Information and Accountability, in support of the Global Strategy for Women’s and Children’s Health
Poorest-differences greater 20% identified by the UN Commission on Information and Coverage.

**MATERNAL AND NEWBORN HEALTH**

Under-five mortality rate
Deaths per 1000 live births

Maternal mortality ratio
Deaths per 1000 live births

Prevention of mother-to-child transmission of HIV
Eligible HIV+ pregnant women receiving ART for their own health (% of total HIV+ women)

Child health

Immunization
- Percent of children immunized against measles
- Percent of children immunized with 3 doses DTP
- Percent of children immunized with 3 doses Hib

Pneumonia treatment
- Percent children <5 years with suspected pneumonia taking appropriate health provider
- Percent children <5 years with suspected pneumonia receiving antibiotics

**NUTRITION**

Wasting prevalence (moderate and severe, %) 3 (2010)
Low birthweight incidence (moderate and severe, %) 7 (2010)

Early initiation of breastfeeding (within 1 hr of birth, %) 71 (2013)
Introduction of solid, semi-solid/soft foods (%) 79 (2013)
Vitamin A two dose coverage (%) 76 (2013)

**EQUITY**

Socioeconomic inequities in coverage
Household wealth quintile: Poorest 20% richest 20%

Demand for family planning satisfied
- Antenatal care 4+ visits
- Skilled attendant at delivery
- *Postnatal care
- Exclusive breastfeeding
- Measles

DHS 2010

 Coverage levels are shown for the poorest 20% (red circles) and the richest 20% (orange circles). The longer the line between the two groups, the greater the inequality. These estimates may differ from other charts due to differences in data sources.

Developed by Countdown to report on core indicators identified by the UN Commission on Information and Accountability, in support of the Global Strategy for Women’s and Children’s Health.

Note: Based on 2008 WHO reference population.
