Country profiles

The information in the country profiles, customized to showcase the core indicators selected by the Commission on Information and Accountability for Women’s and Children’s Health, is intended to help policy makers and their partners assess progress and prioritize actions to save women’s and children’s lives. These country profiles reflect the data that are available for each country. Most of the data for the Commission indicators come from household surveys: mainly the USAID-supported Demographic and Health Surveys and the UNICEF-supported Multiple Indicator Cluster Surveys.© More information on the data sources for the Commission indicators is available in the annexes to previous Countdown reports: www.countdown2015mnch.org/reports-and-articles.

New survey data are available for 22 countries since the publication of Countdown’s 2012 Report. Coverage estimates that are missing or that are more than five years old indicate an urgent need for concerted action to increase data collection efforts so that updated evidence is available for policy and program development.

This report contains profiles for 75 countries with high burdens of maternal and/or child mortality, including the 49 lowest-income countries covered by the Global Strategy for Women’s and Children’s Health. Profiles are included for the following countries:

Afghanistan, Angola, Azerbaijan, Bangladesh, Benin, Bolivia, Botswana, Brazil, Burkina Faso, Burundi, Cambodia, Cameroon, Central African Republic, Chad, China, Comoros, Congo, Congo, Democratic Republic of the Côte d’Ivoire, Djibouti, Egypt, Equatorial Guinea, Eritrea, Ethiopia, Gabon, Gambia, Ghana, Guatemala, Guinea, Guinea-Bissau, Haiti, India, Indonesia, Iraq, Kenya, Korea, Democratic People’s Republic of Kyrgyzstan, Lao People’s Democratic Republic, Lesotho, Liberia, Madagascar, Malawi, Mali, Mauritania, Mexico, Morocco, Mozambique, Myanmar, Nepal, Niger, Nigeria, Pakistan, Papua New Guinea, Peru, Philippines, Rwanda, São Tomé and Príncipe, Senegal, Sierra Leone, Solomon Islands, Somalia, South Africa, South Sudan, Sudan, Swaziland, Tajikistan, Tanzania, United Republic of, Togo, Turkmenistan, Uganda, Uzbekistan, Vietnam, Yemen, Zambia, Zimbabwe
São Tomé and Príncipe

MATERNAL AND NEWBORN HEALTH

 Coverage along the continuum of care

Skilled attendant at delivery

Prevention of mother-to-child transmission of HIV

CHILD HEALTH

Immunization

Pneumonia treatment

NUTRITION

Underweight and stunting prevalence

Exclusive breastfeeding

EQUITY

Socioeconomic inequities in coverage

Developed by Countdown to report on core indicators identified by the UN Commission on Information and Accountability, in support of the Global Strategy for Women’s and Children’s Health

**MATERNAL AND NEWBORN HEALTH**

**Under-five mortality rate**

Deaths per 1000 live births

**Maternal mortality ratio**

Deaths per 100000 live births

**PREVENTION OF MOTHER-TO-CHILD TRANSMISSION OF HIV**

Eligible HIV+ pregnant women receiving ARVs for their own health (% of all HIV+)

- Percent HIV+ pregnant women receiving ARVs for PMTCT

- Uncertainty range around the estimate

**Socioeconomic inequities in coverage**

Household wealth quintile: Poorest 20% — richest 20%

Demand for family planning satisfied

- Antenatal care
  - 1+ visit
  - 4+ visits
  - Skilled birth attendant
  - Early initiation of breastfeeding
  - ITN use among children <5 yrs
  - DPT3
  - Measles
  - Vitamin A (past 6 months)
  - ORT & continued feeding
  - Care-seeking for pneumonia

Coverages are shown for the poorest 20% (red circles) and the richest 20% (orange circles). The longer the line between the two groups, the greater the inequity. These estimates may differ from other charts due to differences in data sources.

**EQUITY**

**Socioeconomic inequities in coverage**
